

Datathon Event

Friday 6th & Sat 7th November
Auckland & Wellington

Places for the Servian Datathon Event are filling fast!

enterpriseIT (Servian Group) will be holding a Datathon supported by Dataiku on the afternoon of Friday 6th November and Sat 7th November (high level agenda below) across our Auckland and Wellington regional offices.

What's a datathon?

The organisers will pose a question to you, the participants, to work on using publicly available data, and using Dataiku's Data Science Studio to help analyse and interpret your answers.

Datathon pre-event workshop

A week before the Datathon weekend, Servian will host a pre-event workshop to provide information about Dataiku software. There will be representation and assistance from Servian and Dataiku during the Datathon.

What will the weekend look like?

You will be placed into teams to participate in the Datathon. The Datathon will start on the afternoon of the Friday, giving you time to plan your approach and investigate the data. Saturday will be a full day of problem solving, finishing with a presentation by each of the teams.

Food and drinks will be available throughout the day. On Friday evening we will provide drinks and an opportunity to meet the other teams and the Servian consultants.

Agenda

Date	Time	Activity
Friday 30 th October	2pm - 5pm	Virtual Dataiku learning session with Participants
Friday 6 th November	1pm - 5pm	First day set up, understanding the problem statement and data etc.
Friday 6 th November	5pm onwards	Networking, socialising time - getting to know your team and hosts.
Sat 7 th November	10am - 5pm	Datathon: Judging, Prizes etc.

There will be an array of giveaways, judging and prizes throughout the event.

How do I get involved?

You can register your interest - [Here](#)
